

How much can my baggage weigh?

Typical Weights for a Cessna 172 (2300lb)	Fuel 189 liters, 50USG	Empty Weight 136kg (298lb)	659 kg (1430lb)	Take off Weight 1043 kg
			Disposable weight	257 kg (565lb for you, your partner and baggage)

So, if you both weigh 200lbs, that leaves 156lbs for "extras"; Pack light. There are places to launder clothes while on tour. It's better for the plane to have extra capacity than be too heavy, right? Plus, you'll want room for souvenirs!
